st. Lwowska 4D/7 61-131 Poznań

EXPERIENCE

Internship as a PHP Programmer (06.2019-10.2019)

Creating websites using PHP in the Laravel framework, working in a team, consulting implemented solutions with a mentor and other programmers, working under time pressure.

Internship as a Unity Developer at Indeep Studio (10.2022-01.2023)

Creating games using the Unity engine, which is powered by the C# programming language, working with Jira software (creating tickets, documentation, managing deadlines for assigned tasks), managing a remote GitLab repository (committing, creating branches, and merging).

EXTRA ACTIVITY

PROJECT - THE STAR (06.2023 - PRESENT)

The Star is a point-and-click game in which I play the role of a Programmer and IT Support. My tasks include initializing and maintaining the repository for all group members, as well as installing and configuring the UE5 engine required for work. Being the only programmer in the group, I am responsible for the entire technical framework. This requires meticulousness, creativity, and self-reliance in action.

EDUCATION

COLLEGIUM DA VINCI IN POZNAŃ (10.2018-03.2022)

Bachelor of Engineering in Computer Science with a specialization in game programming and interactive multimedia

INTERESTS

- Mountain hiking
- Computer games
- Slavic mythology
- New technologies
